Scots Property Management, The solution to your heritable property problems!

Scots Property Management L.L.P. have been in business since December 2002, providing a multi-trade repair, maintenance and monitoring service for a wide client base ranging from private individuals through to housing associations, solicitors and asset management companies. Through the auspices of the latter two clients, we undertake work on behalf of many of the High Street Banks and Building Societies.

Our major area of business is in the repossession of property, both commercial and domestic, and, in this context, our service includes gaining entry to premises and thereafter ensuring they are made lock fast and secure. This is followed up with the provision of draining down heating and water systems, the cleaning of a property, emergency repairs, interior building maintenance, property clearance and garden maintenance. Each undertaking is backed up by 'Before' and 'After' digital imagery, stored on our Server. We are registered with the Scottish Environment Protection Agency and we also have a 'two million pound cover' Public Liability Policy.

Within the current legislative guidelines, we can also deal with the removal and disposal of hypodermic needles, motor vehicles, the eradication of mice, rats, fleas etc; and the securing of premises by means of shuttering of doors and windows.

Through our extensive network of sub-contractors we can also deal with all types of window and door repair or replacement, plumbing work and roof repairs.

To help us achieve our business aims we operate a multi skilled workforce made up of directly employed contractors and sub-contractors who are complemented by an office support team who, making use of Information Technology, organise, allocate, monitor and control all aspects of the work which we undertake.
